WORK EXPERIENCE

IT Technician

Norwich Computers

Description

I spent this time being taught how to tear apart, diagnose, and put back together electronic devices, which taught me what it feels like to work with others in a job, as well as all the technical skills, such as how all the computer parts communicate with one another.

02/2023 - 06/2023

ACHIEVEMENTS

Awarded Best Software

During my first year in Access Creative College, we were told of an awards ceremony happening at the end of the year, for which people will be nominated for certain categories. For that reason, I coded a Screensaver program, which I then submitted, and was awarded Best Software, beating even the Software Students.

High School Prefect

While in High School, each year had some sort of Student leadership role, including Student Ambassador, Student Leader, etc, which I managed to get practically every year. I was part of the Student Council, and in some of my final years, I became a Prefect after completing an interview and submitting a form.

Organising and Hosting a School Event

In primary school, during my final year, I proposed we hold a Spelling Bee competition, which became heavily supported by an English teacher. After a while, I had to pitch the idea to the school principal, who agreed, and proceeded to give me, and some of my helpers, an office for a day, so we may plan speeches, jokes, and questions. After a couple weeks, the entire school took part.
